

Objective

To pursue an opportunity that combines my academic background, my career experience, and my passions for building and developing better systems of efficiencies and controls, with a company I can build and grow with long-term.

Skills

- Experienced estimating, building and effectively maintaining and tracking cost-loaded level-IV schedules in Primavera P6 & Microsoft Excel for projects pertaining to electrical and instrumentation industrial constructions with a sufficient understanding of the industry and of computer systems, peripherals, networks, and databases.
- Primavera P6, Microsoft Office Suite, Arduino, TensorFlow, Machine Learning, C++, Python, Docker, Linux, and website development.
- Ambitiously driven, self-starter; with a sharp understanding of self and others, business concepts and strategies, ethics and statutes, and a determined work ethic derived from a wide variety of skills and experiences.

Work Experience

Conner Industries – Scheduler / Planner – Borger, Texas – Aug 2023 – Current

- Created excel estimator with variable labor, equipment, and material rates pulled automatically based on customer that builds up estimates by tasks for scheduling requirements.
- Same estimator provides a scheduling opportunity for preliminary scheduling and exports a proposal based on estimated scope of work, with defined contract clarifications.

Ardent Services – Project Engineer and Scheduler – Phillips 66 Borger, Texas - July 2022 - Current

- Estimated, and proposed \$5.6M of work; Scheduled and maintained Level-III cost loaded schedules effectively.
- Built and implemented effective alternatives that eliminated nearly 100% most user-errors, saved time, and provided sound data with the implementation of appropriated transparencies and discretions to required supervision and other personnel and effectively eliminated the redundancy in operational tasks allowing the organization to effectively inherit the workloads of all departments.

Loenbro, Inc. – Instrument tech & Electrical Apprentice @ Colstrip Power Plant in Colstrip, MT – Jan – July 2022

- Fabricated and installed all tubing, valves, regulators and supports
- Set regulators and snooped all lines for leaks
- Assisted management and the electrical and piping division during start-up and commissioning.

Pandemic Work:

During this time, I remained working with several part time opportunities non-relative to my career experience.

Bilfinger Westcon, Inc. – Field Engineer @ Anadarko in Greeley, CO – 2019 - 2020

- Promptly submitted clear, concise RFI's to client on behalf of the field team (Lead time: Max 24 hours)
- Aggressively pursued change orders per contract clarifications and out of scope work (Lead time: 1-5 days)
- Recorded time for all employees, gathered quotes and procured materials, estimated new change orders, and worked to get their electrical division up to date, organized, and prepared for their upcoming lump-sum initiative.

Ardent Services – Electrical Apprentice / Field Engineering @ Praxair in Lake Jackson, TX – Jan – Aug 2019

- Promptly submitted clear, concise RFI's to client on behalf of the field team (Lead time: Max 24 hours) • Aggressively pursued change orders per contract clarifications and out of scope work (Lead time: 1-5 days).
- Recorded time for all employees, gathered quotes and ordered materials, estimated new change orders, and maintained healthy customer relations through detailed daily and weekly field reports.

Education

2019 – 2017 University of Louisiana at Lafayette

2003 – 2007 Acadiana High School

2009 – 2012: Renewable Resources

Graduated with highest level of a TOPS Scholarship

2014 – 2017: Electrical Engineering

- Concentrations: Telecommunications, Mathematics

Volunteer Work: 2009-2019 – Assistant to the Production Coordinator @ Festival Acadiens
